## Innovative product launch to help you Guarantee your Success...

### *'Business Success Strategies for Start-ups'*

Some of the UK's top Business Coaches have got together to solve the problem of how to help Entrepreneurs in the UK's get off to a flying start and guarantee their business success.

Have you ever wondered why some people make success look so easy yet others work every hour possible and still just stand still. How come that in this tough market some businesses are having their best year ever, whilst others are making people redundant? Why can some

business keep raising their prices whilst others are trying to operate at miniscule margins? When we all have the same 24 hours in a day how come some business owners are overworked and miss every family holiday to cover their bills whilst others seem to spend half the week on a golf course?

Having worked with over 5000 business owners, including a 'Dragon' from the 'Den' and a 'Secret Millionaire' from the hit TV shows, these top business coaches know the answers to these questions and have combined their joint knowledge to share with you which strategies and actions you need to be implementing to guarantee your success.

They also point out what not to do and can fast track your thinking so your business joins the handful of businesses achieving the 40-100% annual growth that their other clients achieve.

Well aware that most start-ups, whilst normally keen for this information, are not at a stage that they could invest in working with a top business coach, this team of Business coaches also had to overcome the problem of how to provide services that normally cost £1000-£2000 a month for a 'no-brainer' price of less than £60 a month instead, **plus** work

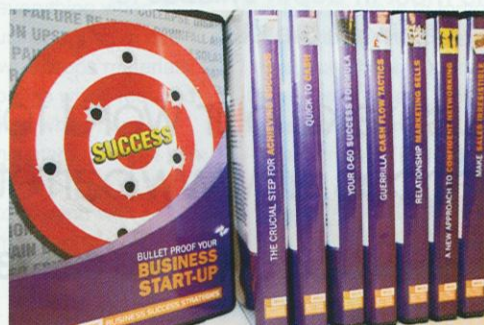

out how to incorporate this into the lives of overworked and time starved business owners!

The answer is ***Business Success Strategies for Start-ups*** which is a monthly business coaching programme covering all the key areas Entrepreneurs should be addressing including how to make sales irresistible, getting quick to cash, how to leverage your time, improving your networking skills, how to develop your website so it generates real sales, relationship marketing techniques that work, and how to bullet proof your start-up... to just name a few of the subjects covered every month.

Each of these modules arrives at your home or office in CD format that you can listen to in your car, at the gym, on your ipod or computer! Even more importantly, unlike other business resources, each module includes a step-by-step coached exercise to break down how you can implement the profit building ideas directly into your business.

For this month only, they are offering readers of 'Start your Business' a special half price introductory offer. If you are interested in guaranteeing your success then we recommend you take a look at this innovative product launch:
